I started my programming journey by writing small Python script for work and fun. Meanwhile, I built the knowledge of front end HTML and CSS. I found that I was fascinated by programming and started to learn some backend technology and C by myself. There were some difficulties in the learning process so I joined Northcoders' coding bootcamp to start learning systematically. Although I have only been trained as a software engineer for less than four months, I have had a good understanding and practice of frontend, backend, data base and network.

TECHNICAL SKILLS

Language	JavaScript, C, Python
Frontend	React, Material-UI, HTML, CSS
Backend	Express, PostgreSQL
Testing	Jest, Selenium
Other	React Native, Git, Vim

EXPERIENCE

Northcoders, Manchester <i>Trainee Software Developer</i>	09/2020 - 01/2021
---	-------------------

- Trained to be a professional software developer in Northcoders' 14 weeks coding bootcamp.
- Built experiences to work in pairs and groups remotely.

Xinlung Group Ltd, Manchester <i>Accommodation advisor</i>	09/2019 - 06/2020
--	-------------------

- Self-learned Python to improve work efficiency:
 - Used Python script to download structured data from multiple web pages and converting into Excel format;
 - Used Python-Wechat API to send notification messages to certain students automatically.
- Helped students to find the most suitable accommodation based on individual needs. Provided high level of customer service while achieving the sales targets. Received zero complain. Helped the company to build positive reputation.
- Built and executed two email marketing campaigns to raise students' awareness on products and sales events(e.g. live stream). 23% of the students booked accommodation with us afterwards.
