I started my programming journey by writing small Python script for work and fun. Meanwhile, I built the knowledge of front end HTML and CSS. I found that I was fascinated by programming and started to learn some backend technology and C by myself. There were some difficulties in the learning process so I joined Northcoders' coding bootcamp to start learning systematically. Now I have a good understanding and practice of frontend, backend, database and network.

TECHNICAL SKILLS

Language	JavaScript, C, Python
Frontend	React, Material-UI, HTML, CSS
Backend	Express, PostgreSQL, Firebase, Node.js
Testing	Jest, Selenium
Other	React Native, Git, Vim

EXPERIENCE

Northcoders, Manchester   09/2020 - 01/2021

Trainee Software Developer

· Trained to be a professional software developer in Northcoders' 14 weeks coding bootcamp.

· Built experiences to work in pairs and groups remotely.

· Main projects:
- De-Swap: a React Native Mobile App with a real-time chatting feature, aim to make fashion more sustainable by allowing people to swap their unwanted clothes. Created using JavaScript, Firebase Realtime Database, Firebase Authentication, Firebase Hosting, Firestore, React Native, React Navigation, Android Studio.
- My website: created using JavaScript, AWS, React and Material UI.

Xinlung Group Ltd, Manchester   09/2019 - 06/2020

Accommodation advisor

· Self-learned Python to improve work efficiency:
- Used Python script to download structured data from multiple web pages and converting into Excel format;
- Used Python-Wechat API to send notification messages to certain students automatically.

· Helped students to find the most suitable accommodation based on individual needs. Provided high level of customer service while achieving sales targets. Received zero complaint. Helped the company to build positive reputation.

· Built and executed two email marketing campaigns to raise students' awareness of products and sales events(e.g. live stream). 23% of the students booked accommodation with us afterwards.
